

# TIM GARDINER

## Behind the Scenes

Tim began working at the Kavon in late 2005 - Just in time for the Christmas season. Since joining the Kavon, Tim has overseen the production of several Kavon-made films, as well as pre-show introduction videos and other

presentations. Tim's role also extends into graphics and programming, often creating much of the marketing and promotional material that the Kavon uses day-to-day.

The Kavon's Booking Administration, Website, Intranet and newest waiter/bar computer system was designed and written by Tim, ensuring that support was always close by. Whilst Tim's on-floor activities have begun to fade, his technical ability and productions are paramount throughout the Kavon and will continue to become more exciting and involving with each new show and idea.
